📍 Paris, France

Fullstack developer for over 8 years, I place great importance on code quality while remaining pragmatic about constraints. I enjoy sharing my knowledge, learning from others, and fostering a team dynamic based on mutual support and constructive, benevolent discussions.

Experience

Software Engineer

Lucca, Paris | 2016 - Present

Since 2016, I have progressed from a junior fullstack web developer to leading a team of 4, then working as a senior developer on new projects. I have worked within different teams, contributing to the implementation of robust software architectures, particularly in DDD and Clean Architecture.

I have been involved in designing and developing various solutions using .NET Framework & Core, ASP.NET, SQL Server, and Angular, taking on increasing responsibilities such as team leadership and defining best development practices. These diverse experiences have strengthened my technical skills while contributing to the company's growth.

Software Engineering Apprentice

French Alternative Energies and Atomic Energy Commission (CEA), Saclay | 2013 - 2016

Development of C# and WPF applications for data acquisition and visualization from sensors. Creation of a touch-based development environment for expert system design, integrating image processing algorithms in fuzzy mathematical morphology.

Formation

- Polytech Paris-Saclay – Engineering degree specialized in Computer Science | 2013 - 2016
- IUT d'Orsay – DUT in Computer Science | 2011 - 2013
- Lycée Jean-Baptiste Corot – Scientific Baccalaureate, honors, European English section | 2008 - 2011

Certifications

- Sauveteur Secouriste du Travail (SST) – 2025

Langues

- Français : Native speaker
- Anglais : Fluent (C1, TOEIC 930)
- Espagnol : Basic knowledge
